

geo_struct::setPeriodicityToEl

geo_struct::setPeriodicity
ToStrain

geo_struct::zeroPeriodicity

```
graph LR; A[geo_struct::setPeriodicityToEl] --> C[geo_struct::zeroPeriodicity]; B[geo_struct::setPeriodicityToStrain] --> C;
```

The diagram illustrates a mapping or relationship between two source functions and a target function. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'geo_struct::setPeriodicityToEl'. The bottom box contains the text 'geo_struct::setPeriodicityToStrain'. On the right, there is a single gray rectangular box with a black border containing the text 'geo_struct::zeroPeriodicity'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both source functions map to or result in the target function.
